

SPIRO® DISC PRO

Radiation protection for Semi-Industrial EMF emissions & Electrohypersensitive Individuals

Multifrequency Filter Protection for RFR / ESD / LF Magnetic Flux

The **SPIRO® DISC PRO** is a long-range filter containing magnified properties (3 times more powerful than the SPIRO® DISC). It has been shown to effectively filter multiple disturbances and interferences from severe EMF pollution emitters, making it ideal for commercial premises or to provide maximum protection to the most sensitive population, such as electro-hypersensitive people, pregnant women, and babies.

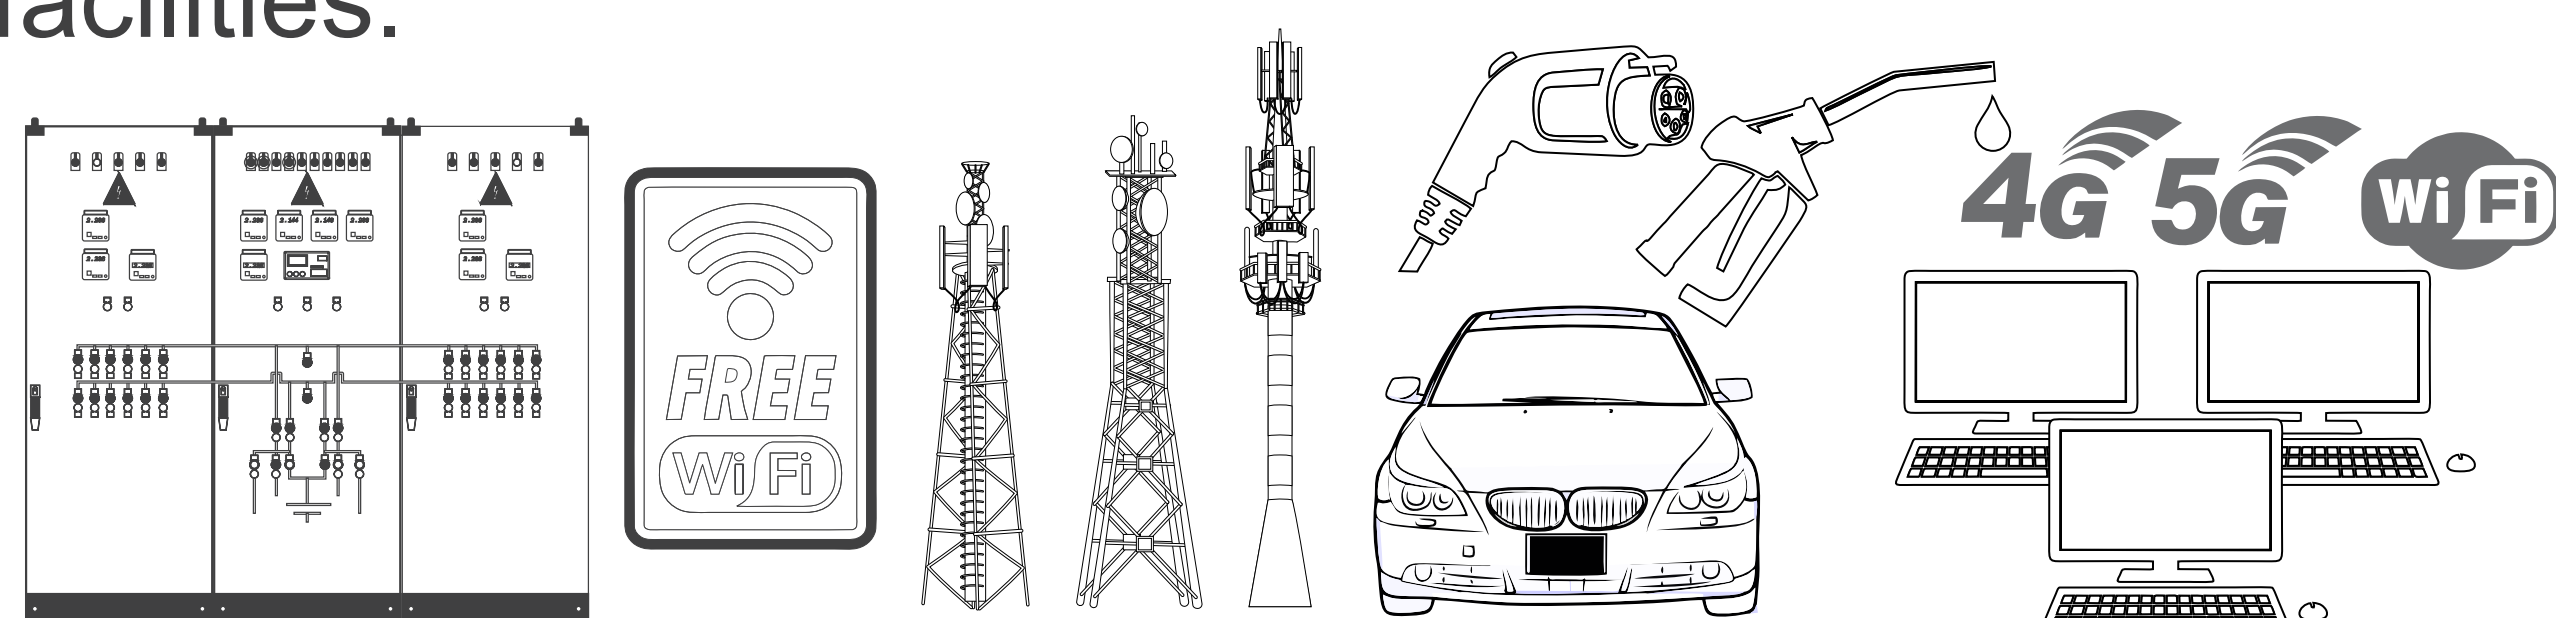

Made for

Protection from Direct Radiation Emissions:

Severe sources of EMFs, such as Electrical Rooms, Server Rooms, Public WiFi Transmitters / Hybrid and EV Cars made after 2020 / Highly-Polluted Homes in close proximity to Cell Phone Towers or High Voltage Lines.

Protection for Spaces:

The SPIRO® DISC PRO is also a larger protection for Home & Offices Spaces from background radiation (far field EMFs) from multiple sources of RF including 4G / 5G frequency bands / Machinery in industrial facilities.

As a wellness enhancement tool:

The benefits of the SPIRO® DISC are amplified in the **SPIRO® DISC PRO**.

Placing the **SPIRO® DISC PRO** below the pillow will help individuals with more severe Sleep Disorders such as insomnia, promoting a faster restoration in the functionality of the nervous system (including the brain activity), endocrine system, and heart rate variability. This helps recovering their health and quality of life with a long-term use.

The effect observed in water is stronger and happens faster with the **SPIRO® DISC PRO** than with the SPIRO® DISC. The same happens with food preservation.

As a wellness enhancement tool:

For EHS cases:

The **SPIRO® DISC PRO** is a suitable solution for Electrohypersensitive (EHS) individuals who require a more powerful dominant field to stabilize their sensitive responses to EMFs, including natural sources. Dozens of cases of EHS use the SPIRO® DISC PRO as a permanent tool to have a normal life while using technologies, including EV Cars and other strong and modern pollutants.

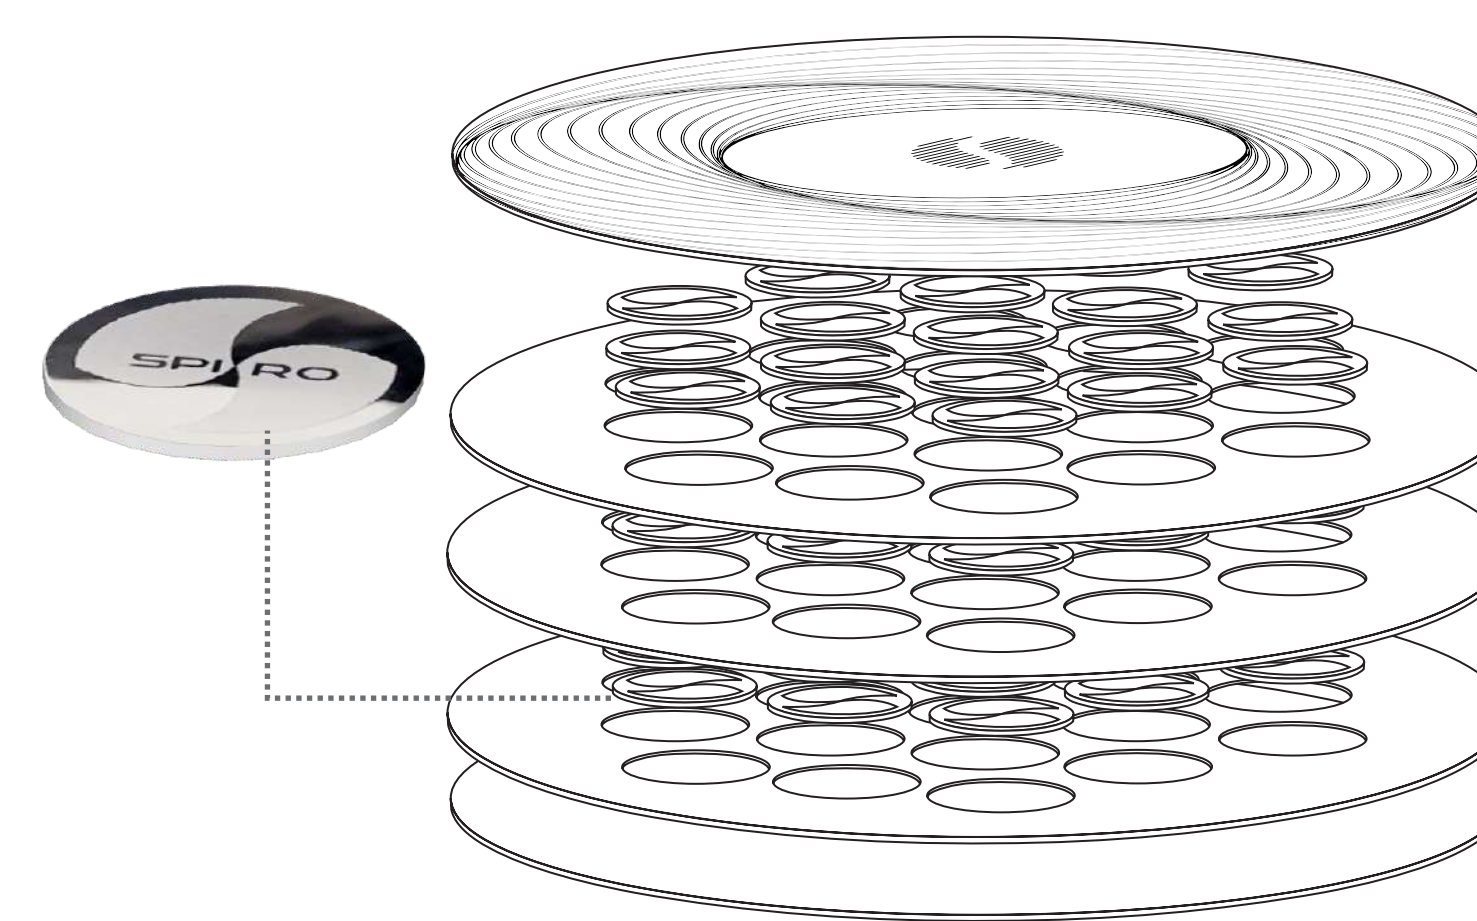

For individuals with EHS, the **SPIRO® DISC PRO** is part of a comprehensive environmental health approach that includes the control of chemical and food sensitivities, nutritional guidance, and advice on healthy lifestyles. The SPIRO® DISC PRO is the base SPIRO® solution for individuals with EHS; however, such individuals are frequently immersed in severe fields of pollution, and such spaces require SPIRO®'s multiple approach in ELF fields, high power density RF, and microwave signals.

How does it work?

The **SPIRO® DISC PRO** is based on NOXTAK's patented and scientifically proven technology: a nanocomposite material that filters out the interferences and disturbances in artificially-generated EMF radiation by organizing radiation spins (Spin Radiation Organizer - SPIRO®), which makes it behave the same way as beneficial natural EMFs.

This product contains **57 broad-spectrum SPIRO® films**.

Unlike anti-radiation products, **SPIRO® DISC PRO** is the only solution that protects you from both types of radiation generated by wireless devices, household appliances, office equipment, and highly polluting devices, while improving their connectivity, performance, and energy efficiency. The disc has an amplified capacity dedicated to dealing with electrical current exposure problems (low-frequency electric and magnetic fields), simultaneously, it can protect and filter larger high-frequency emissions from telecommunications.

In the case of low frequencies (ELF), the SPIRO® material of the disc must interact directly with the nearby emission of the ELF field. Only in the proximity of the low-frequency field will its maximum performance be obtained. In other words, the disc must be within the near magnetic or electric field of the device.

How to use it?

This product contains a comprehensive usage guide and is usually sold together with a professional electromagnetic field assessment for near and far field exposure. Depending on the particular case of each user, our analysts will suggest a specific location for the product(s). Likewise, it should be noted that the **SPIRO® DISC PRO** is the basis for semi-industrial solutions or high severity exposures, in which cases it is used in conjunction with other **SPIRO® DISC PRO**, and, depending on the case, they are used and placed in a specific way to get the maximum benefit and performance from the spin radiation ordering principle.

Field studies have shown that, as multiple discs are used, the benefits are the same, but the rate at which the treated area or affected individual fully recovers changes. In 8 years of research with multiple **SPIRO® DISC PRO** in venues and different scenarios, no secondary or adverse effects have been reported due to the high accumulation of SPIRO®. Tests have been performed with up to 1000 times the concentration of a **SPIRO® DISC PRO**.

The reason for this is that SPIRO® presents unique natural properties coming from the alloy of multiple Nps (Nanoparticles) and, therefore, there are no contraindications.

Benefits of the SPIRO® DISC

- **All the benefits of the SPIRO® DISC are amplified with the SPIRO® DISC PRO**, according to studies conducted by IGEF and case studies in individuals with EHS.

- Protects environments from high-frequency radiation from nearby sources or distant external sources (medium exposure from mobile towers or high-voltage lines).
- Protects and filters ELF near-field emissions from the most energy-consuming devices (electrical panels, smart meters, major appliances, office machinery, servers, and surveillance systems).
- Improves the diagram and propagation pattern of WiFi and Bluetooth transmitters, reducing the interference present and improving connectivity between devices.
- It is capable of protecting from up to 1900 mV of dirty electricity, as long as the disc material is within the exposure field.

- **Efficient protection** for multi-emission modern EVs
- **Efficient protection** against severe cases of Dirty Electricity
- **Efficient protection** in cases of exposure near high voltage lines
- **Efficient protection** against cases of exposure near mobile

Clinical studies conducted with the **SPIRO® DISC PRO** in multiple exposure environments have shown that it is a perfect solution for improving sleep quality, especially when used near the head of the bed or even under the pillow. Additionally, multiple studies show that the **SPIRO® DISC PRO** is an efficient solution for severe cases of Electrohypersensitivity, promoting recovery of health indicators in individuals. Studies report greater and faster improvement than seen with the use of the SPIRO® DISC in terms of HRV (Heart Rate Variability) and Stress indices. Likewise, improvements in the sleep pattern of users and a gradual decrease in symptoms and signs of electrical sensitivities are reported.
